

Nylon RFID Bin Tag

Durable Nylon RFID Bin Tag transponders have excellent resistance to water, salt spray, mineral oil and petroleum, as well as high resistance to shock and temperature changes.

JYL-Tech waste Bin Tag transponders perform exceptionally well to withstand abuse and help waste management organizations achieve optimal data integrity easily and efficiently. RFID bin tag fit easily into most litter boxes.

Highlights

Easy to integrate: Standard size for easy installation or retrofit.

Tamper Resistant: Custom wrench screw drive to prevent fraudulent disassembly.

Extensive Compatibility: The choice of frequency and memory capacity addresses common global installations and protocols.

Consistent performance: No line of sight required JYL, option to mount on plastic or metal case.

Specifications

Item No.	JYL-WBT30
Tag Dimensions	Round 30mm
Thickness	15 mm
IC Type	LF 125Khz/ 134.2Khz, HF/ NFC 13.56Mhz , UHF 916~818Mhz
Material	Nylon + Epoxy Filling
Color	Black / Red / Blue / Green / Yellow or Customized

Installation
